

The Economic Impact of Nonprofit Arts and Culture Organizations and Their Audiences in the Quad Cities Region (Fiscal Year 2013)

Direct Economic Activity	Arts and Culture Organizations	+	Arts and Culture Audiences	=	Total Industry Expenditures
Total Industry Expenditures	\$32,877,690		\$38,464,242		\$71,341,932

Spending by Arts and Culture Organizations and Their Audiences Supports Jobs and Generates Government Revenue

Total Economic Impact of Expenditures (Direct & Indirect Impacts Combined)	Economic Impact of Organizations	+	Economic Impact of Audiences	=	Total Economic Impact
Full-Time Equivalent (FTE) Jobs Supported	1,018		888		1,906
Household Income Paid to Residents	\$24,170,000		\$23,748,000		\$47,918,000
Revenue Generated to <u>Local</u> Government	\$994,000		\$1,857,000		\$2,851,000
Revenue Generated to <u>State</u> Government	\$1,466,000		\$3,470,000		\$4,936,000

Event-Related Spending by Arts and Culture Audiences Totaled \$38.46 million (excluding the cost of admission)

Attendance to Arts and Culture Events	Resident* Attendees	+	Non-Resident* Attendees	=	All Cultural Audiences
Total Attendance to Arts and Culture Events	1,478,220		367,550		1,845,770
Percentage of Total Attendance	80.1%		19.9%		100%
Average Event-Related Spending Per Person	\$15.14		\$43.76		\$20.54
Total Event-Related Expenditures	\$22,380,251		\$16,083,991		\$38,464,242

Nonprofit Arts and Culture Event Attendees Spend an Average of \$20.54 Per Person (excluding the cost of admission)

Category of Event-Related Expenditure	Resident* Attendees	Non-Resident* Attendees	All Cultural Audiences
Meals and Refreshments	\$8.99	\$18.52	\$10.79
Souvenirs and Gifts	\$2.55	\$6.91	\$3.37
Ground Transportation	\$1.12	\$3.37	\$1.55
Overnight Lodging (one night only)	\$0.38	\$12.90	\$2.74
Other/Miscellaneous	\$2.10	\$2.06	\$2.09
Average Event-Related Spending Per Person	\$15.14	\$43.76	\$20.54

* For the purpose of this study, residents are attendees who live within the four-county Quad Cities region that includes Henry, Mercer, and Rock Island Counties in Illinois and Scott County in Iowa; non-residents live outside that four-county region.

About This Study

The *Arts & Economic Prosperity IV* study was conducted by Americans for the Arts to document the economic impact of the nonprofit arts and culture industry in 182 communities and regions (139 cities and counties, 31 multi-city or multi-county regions, and ten states, and two individual arts districts)—representing all 50 U.S. states and the District of Columbia. The diverse communities range in population (1,600 to more than 3 million) and type (rural to urban). The project economists, from the Georgia Institute of Technology, customized input-output analysis models for each participating study region to provide specific and reliable economic impact data about their nonprofit arts and culture industry—specifically (1) full-time equivalent jobs, (2) household income, and (3) local and (4) state government revenue.

Quad Cities Chamber of Commerce contracted with Americans for the Arts to conduct a separate economic impact analysis focusing solely on the nonprofit arts and culture industry in the Quad Cities Region. The methodology used is identical to the national study methodology, providing the ability to compare the results for the Quad Cities Region with those of the national study participants.

Surveys of Nonprofit Arts and Culture ORGANIZATIONS

Each of the 182 study regions attempted to identify its comprehensive universe of nonprofit arts and culture organizations using the Urban Institute's National Taxonomy of Exempt Entity (NTEE) coding system, a definitive classification system for nonprofit organizations recognized as tax exempt by the Internal Revenue Code. In addition, the study partners were encouraged to include other types of eligible organizations if they play a substantial role in the cultural life of the community or if their primary purpose is to promote participation in, appreciation for, and understanding of the visual, performing, folk, and media arts. These include government-owned or government-operated cultural facilities and institutions, municipal arts agencies and councils, private community arts organizations, unincorporated arts groups, living collections (such as zoos, aquariums, and botanical gardens), university presenters, and arts programs that are embedded under the umbrella of a non-arts organization or facility (such as a community center or church). In short, if it displays the characteristics of a nonprofit arts and culture organization, it is included. *For-profit businesses (e.g., Broadway and motion picture theaters) and individual artists were excluded from this study.*

Nationally, detailed information was collected from 9,721 eligible organizations about their fiscal year 2010 expenditures in more than 40 expenditure categories (e.g., labor, local and non-local artists, operations, materials, facilities, and asset acquisition), as well as about their event attendance. Response rates for the 182 communities averaged 43.2 percent and ranged from 5.3 percent to 100 percent. It is important to note that each study region's results are based solely on the actual survey data collected. No estimates have been made to account for non-respondents. Therefore, the less-than-100 percent response rates suggest an understatement of the economic impact findings in most of the individual study regions.

In the Quad Cities Region, 69 of the approximately 95 total eligible nonprofit arts and culture organizations identified by the Quad Cities Chamber of Commerce participated in this study—an overall participation rate of 73 percent. The 69 organizations that participated are listed below:

Afro-American Heritage Center, Artists Unlimited, Augustana College Teaching Museum of Art, Augustana Fryxell Geology Museum, Ballet Quad Cities, Beaux Arts Fund Committee, Big River Brass Band, Bishop Hill Arts Council, Bishop Hill Heritage Association, Bix Beiderbecke Memorial Society, Bix Beiderbecke Museum and World Archives, Bucktown Revue, Buffalo Bill Cody Homestead, Buffalo Bill Museum of LeClaire, Catich Gallery, Celtic Cultures Alliance Of The Quad Cities, Center for Belgian Culture, Chamber Music Quad Cities, Chippianock Cemetery Heritage Foundation, Citizens to Preserve Blackhawk Park Foundation, Colonel Davenport Historical Foundation, Countryside Community Theater, Dan Nagle Walnut Grove Pioneer Village, Davenport Parks & Recreation (Davenport Junior Theatre, Davenport School Museum, Eco Arts Council of the Quad Cities, Family Museum of Arts and Sciences, Figge Art Museum, First Presbyterian Church, Friends of the Quad Cities, Galvin Fine Arts Center, Geneseo Art League and Gallery, Geneseo Historical Association, Genesius Guild, German American Heritage Center, Gold Coast/Haumburg Historic District, Great Sounds Promotions, iWireless Center, Junior Theatre, MidCoast Fine Arts, Midwest Writing Center, Mississippi Valley Blues Society, New Ground Theater, Niabi Zoo, Nova Singers, Palmer Family Residence, Playcrafters Barn Theater, Prentiss Players, Putnam Museum of History and Natural Science, Quad Cities Ballet Folklorico, Quad Cities Botanical Center, Quad Cities Community Broadcasting Group (WGTV), Quad City Arts, Quad City Flutes Unlimited, Quad City Music Guild, Quad City Symphony Orchestra, Quad City Wind Ensemble, River Center for the Performing Arts (DBA Adler Theatre), River Music Experience, Rock Island Art Guild, Rock Island County Historical Society, Rozz Tox QC, Scott County Historic Preservation Society, St Patrick Society, St. Ambrose University Community Symphony Orchestra, Vander Veer Botanical Park, William Butterworth Foundation (Butterworth Center and Deere-Wiman House), WQPT, and WVIK 90.3 FM (Augustana Public Radio)

Surveys of Nonprofit Arts and Culture AUDIENCES

Audience-intercept surveying, a common and accepted research method, was conducted in all 182 of the study regions to measure event-related spending by nonprofit arts and culture audiences. Patrons were asked to complete a short survey while attending an event. Nationally, a total of 151,802 valid and usable attendees completed the survey for an average of 834 surveys per study region. The randomly selected respondents provided itemized expenditure data on attendance-related activities such as meals, souvenirs, transportation, and lodging. Data were collected throughout 2011 (to guard against seasonal spikes or drop-offs in attendance) as well as at a broad range of both paid and free events (a night at the opera will typically yield more spending than a weekend children's theater production or a free community music festival, for example). The survey respondents provided information about the entire party with whom they were attending the event. With an overall average travel party size of 2.69 people, these data actually represent the spending patterns of more than 408,000 attendees, significantly increasing the reliability of the data.

In the Quad Cities Region, a total of 958 valid and usable audience-intercept surveys were collected from attendees to nonprofit arts and culture performances, events, and exhibitions during 2013-14.

Studying Economic Impact Using Input-Output Analysis

To derive the most reliable economic impact data, input-output analysis is used to measure the impact of expenditures by nonprofit arts and culture organizations and their audiences. This is a highly regarded type of economic analysis that has been the basis for two Nobel Prizes. The models are systems of mathematical equations that combine statistical methods and economic theory in an area of study called econometrics. They trace how many times a dollar is re-spent within the local economy before it leaks out, and it quantifies the economic impact of each round of spending. This form of economic analysis is well suited for this study because it can be customized specifically to each study region. To complete the analysis for the Quad Cities Region, project economists customized an input-output model based on the local dollar flow between 533 finely detailed industries within the economy of Henry, Mercer, and Rock Island Counties in Illinois; Scott County in Iowa. This was accomplished by using detailed data on employment, incomes, and government revenues provided by the U.S. Department of Commerce (County Business Patterns, the Regional Economic Information System, and the Survey of State and Local Finance), local tax data (sales taxes, property taxes, and miscellaneous local option taxes), as well as the survey data from the responding nonprofit arts and culture organizations and their audiences.
